- Green Technologies
- ACADEMIC INSTRUCTION

CALL 401.273.7528

YouthBuild Providence is a ten-month alternative education program committed to fostering an earnest awareness of self and community in the urban youth it serves. Through an innovative project based curriculum that integrates construction training, academic courses, and personal and professional development seminars, trainees gain a relevant skill foundation on which to build a more solid future. Sustained Service Learning endeavors to provide an opportunity for individuals to take positive ownership in city neighborhoods and to recognize the vital roles they play in the prosperity of their own communities. Our goal is to provide the framework within which young people can identify wholesome potentials and routes of achievement that lead to positive and productive life experiences. Currently, YouthBuild Providence is a participant in a national study to learn how and whether YouthBuild helps the young people it serves. To have an opportunity to enroll in the YouthBuild program, applicants will need to attend an orientation where they will learn more about the program and the study. Not everyone interested in the program will be able to enroll. Enrollment in the program will be based, in part, on agreeing to participate in the study and a lottery (much like drawing names from a hat).”
